

*Beautiful hurricane protection
right at your doorstep—and your windows.*

STAYSAFE™
PEACHTREE IMPACT
RESISTANT PRODUCTS

Hurricane certified. Extra-strong frames. Resilient laminated glass. Powerful glazing sealants. That's what it takes to fend off a hurricane. And that's what goes into every Peachtree StaySafe product. Together, they form a complete system of proven protection from flying debris and high-velocity winds.

WHY STAYSAFE IMPACT-RESISTANT PRODUCTS?

Remove the old-fashioned hurricane shutters. Recycle the bulky plywood panels. With StaySafe, you get the protection you need without the hassle of add-on devices. Best of all they're from Peachtree, the brand America has trusted since 1959.

Ordinary products. During a hurricane, glass in ordinary windows and patio doors can shatter from flying debris and high-speed winds, causing a change in air pressure that literally can blow a home apart.

(left illustration)

StaySafe. Peachtree's impact-resistant products—tested effective against winds up to 180 to 200 miles per hour—help keep you and your home safe and sound.

(right illustration)

Due to factors beyond Peachtree's control, it is not possible to guarantee that windows will meet published ratings and specifications after they are installed. Test results may vary by size of product.

See [technical specification](#) information for other window sizes and types.

Building code compliant. StaySafe products are specifically designed to comply with the stringent building requirements of Miami-Dade County. They meet or exceed industry standards for wind pressure and impact resistance, and can be specified with Low-E2 insulated glass with argon gas to satisfy energy codes in northeastern states.

Fortified glass. Up to four times stronger than traditional glass, StaySafe's laminated glass features a tough interlayer of .090" gauge KeepSafe® Maximum polyvinyl butyral (PVB) that resists impact from flying debris and traps shards of broken glass. Strong sealants keep the glass from breaking away from the frame.

Proven protection. Before any window or door product can be certified as impact resistant it must go through a battery of difficult tests. First the unit must go through extensive air and water testing. The second round of tests simulates flying debris by shooting a 2 x 4 at the window from a high-powered air cannon. Finally, the unit goes through intense cycles of positive and negative loads of pressure. If all tests are passed, then the product can become certified.

STRONGER THAN SHUTTERS OR PLYWOOD. AND MUCH BETTER LOOKING.

Hurricane-force winds. Flying debris. Damaging hail. Nothing gets by Peachtree StaySafe windows and doors. Designed for coastal areas, they feature naturally strong handcrafted hardwood frames, dent-resistant extruded aluminum-clad exteriors, and optional hardwood interiors. And with custom colors, shapes and sizes, it's easy to get just the right look.

Outstanding features. Handcrafted hardwood frames are naturally strong. Exquisite pine or hardwood interiors add the warmth and beauty of wood to any room. Dent-resistant, extruded aluminum-clad exteriors are built to endure extreme conditions without chipping or peeling. Multiple weather stripping maximizes energy efficiency. Integral nailing fins simplify installation and enhance overall structural stability. So your StaySafe windows and patio doors weather the storm with all the beauty and style you've come to expect from Peachtree.

All your favorite styles. Double hung windows. Casement windows in single, double and triple configurations. Awning windows. Direct-set and picture windows in single and double configurations. Specialty shaped windows. Out-swing patio doors. They're all yours with Peachtree's impact-resistant products. And they all are backed by Peachtree's StaySafe Limited Warranty, one of the best warranties in the industry.*

*See actual warranty for complete details.

Out-swing patio door. With four fully adjustable hinges, our out-swing patio door always swings sound and true. A corrosion-resistant, stainless steel multi-point locking system provides real protection against intruders. Optional stainless steel hinges are available.

Casement window. Our casement window's heavy-duty metal roto-operator is designed for years of dependable service. Cam-action locks firmly secure the sash against the frame. Hardware packages are also available for seacoast environments to minimize corrosion.

Double hung window. Our double hung window features a block and tackle balance system, the best system on the market for trouble-free operation. Easy-tilt latches make cleaning quick and simple. Dual cam locks create a secure weathertight seal.

Specialty shaped window. Circles. Quarter rounds. Modified half rounds. Gothic arches. Triangles. Trapezoids. Pentagons. Octagons. Custom shapes and sizes. If you can dream it, we can build it.

STRONGER THAN SHUTTERS OR PLYWOOD. AND MUCH BETTER LOOKING.

Hurricane-force winds. Flying debris. Damaging hail. Nothing gets by Peachtree StaySafe windows and doors. Designed for coastal areas, they feature naturally strong handcrafted hardwood frames, dent-resistant extruded aluminum-clad exteriors, and optional hardwood interiors. And with custom colors, shapes and sizes, it's easy to get just the right look.

Custom colors. Our extruded aluminum-clad exteriors are virtually maintenance-free and available in eight standard colors, 47 designer colors, and unlimited custom-matched colors.

* Colors have been reproduced as accurately as web technologies permit. Visit your Peachtree dealer for actual product color samples.

If you could design your own windows or doors, what details would you include? With our myriad of choices, it's easy to get exactly what you want. Examine your options, tell us what you like, and our craftsmen will customize windows and doors just for you.

Elegant pine or hardwood interiors. Choose from six interior wood species, each with its own distinct charm. Interiors are also available primed or prefinished white.

Decorative Grilles. When plain windows just won't do, our decorative grilles are the answer. Choose from 7/8" or 1-3/8" profiled full-surround removable interior grilles that snap in and out for easy cleaning; Grilles-Between-The-Glass (GBG); interior Simulated Divided Lites (SDL) in 7/8" or 1-3/8" wide bars; and 7/8" or 1-3/8" extruded aluminum exterior SDL.

* Grilles-Between-The-Glass (GBG) and Simulated Divided Lites (SDL) with spacer bar are only available with insulated products.

Hardware finishes. Patio door hardware comes in brass, antique brass, oil-rubbed bronze, brushed chrome, chrome, brushed nickel, black and white. Coordinated window hardware is available in white, clay, brass, oil-rubbed bronze and nickel.

SOUND TRANSMISSION RATINGS (STC)

STRUCTURE	STC RATING
CINDERBLOCK WALL	45
INTERIOR WALL	36
7/16" LAMINATED GLASS	36
3/4" INSULATED GLASS WITH DSB	31
1/2" INSULATED GLASS WITH DSB	28
DSB MONOLITHIC GLASS	25

UV and sound barrier. Laminated glass is not only super strong, it blocks more UV rays than ordinary glass. And fewer UV rays mean less fading of interior furnishings. Laminated glass also dampens sound vibrations, which helps keep your home quiet and peaceful, no matter what's going on outside.

As an ENERGY STAR® partner, Peachtree has determined that all products bearing the ENERGY STAR logo meet or exceed the ENERGY STAR guidelines for energy efficiency.

SINGLE GLAZED IMPACT

INSULATED IMPACT

Single Glazed Impact. Specifically designed to meet the stringent windborne debris requirements of Miami-Dade County, StaySafe's beautiful impact-resistant windows and patio doors protect your home 24/7--no shutters or storm panels required.

Insulated Impact. In those areas requiring both energy-rated products and protection from windborne debris, StaySafe insulated impact-resistant products offer both. Structurally designed to meet ASTM 1886 and 1986, they also provide the thermal performance of insulated Low-E2 glass.

Lower insurance rates. Homeowners and public safety officials aren't the only people who value hurricane-resistant products. Those who insure homes do too. Installing Peachtree StaySafe impact-resistant products might qualify you for lower insurance premiums.

All Peachtree products are voluntarily submitted for extensive testing by the following independent laboratories and quality rating groups: the National Fenestration Rating Council (NFRC), the ENERGY STAR program, and the American Architectural Manufacturers Association (AAMA).

In addition, our StaySafe impact-resistant products are rated to ASTM (American Society for Testing and Materials) 1996 Missile level D and ASTM E1886.

Peachtree is a certified partner with Solutia, Inc., manufacturer of KeepSafe Maximum, the polyvinyl butyral (PVB) interlayer

The Worst in Mother Nature Brings Out the Best in Us. On average, five hurricanes hit the U.S. coastline every three years. They are some of nature's costliest and deadliest storms. We can't prevent them, but we can help protect your home and family. Designed for coastal areas, StaySafe's impact-resistant products offer proven protection from hurricane-force winds and flying debris. So when hurricanes threaten, you'll be ready.

predominantly used in StaySafe products.
